

## EU WEEE Policy and Take-Back Program

In August of 2005, the European Union (EU) implemented the **Waste Electrical and Electronic Equipment Directive** (WEEE Directive) 2002/96/EC and later, the WEEE Recast Directive 2012/19/EU, requiring producers of electronic equipment to manage and finance the collection, reuse, recycling and appropriate treatment of waste and electrical and electronic equipment the producer places on the EU market after August 13, 2005. The goal of this directive is to minimize the volume of electrical and electronic waste disposal and encourage re-use and recycling at end of life.

As a hardware manufacturer and distributor Code42 has met its national obligations to comply with the EU WEEE Directive by registering in those countries in which Code42 is considered a Producer.

If you have purchased Code42-branded server products in the EU and these products are at the end of their useful life, please do not dispose of them in municipal waste. In the EU, Code42 is making a return and collection system available to you for discarding these products in compliance with the EU WEEE Directive. See the details below for contacting Code42 about recycling Code42 product.

Waste electrical and electronic equipment (WEEE) and batteries may contain hazardous substances that can have a potential negative impact on human health and the environment. As a consumer, you have an important role in recycling this equipment and contributing to the protection of the environment.

In the European Union, the crossed-out wheelee bin symbol (figure 1) appears on products that should NOT be included in unsorted municipal waste. Products with this symbol should be sorted according to the WEEE Directive.

When Code42 products reach end of life, contact us at [mpc\\_notify@code42.com](mailto:mpc_notify@code42.com) to arrange for the environmentally sound disposal of the product.

Code42 is registered as a WEEE and Battery producer in countries where we have legal obligations.
