CODE42

Code42 Fast Facts

Code42, a leading provider of information security solutions, protects the ideas of more than 50,000 organizations worldwide, including the most recognized brands in business and education. Because Code42 collects and indexes every version of every file, our customers are able to easily detect, investigate and rapidly recover from any data incident, such as ransomware, lost or stolen devices and insider threats.

Code42 Product Overview

Code42's information security solution automatically and continuously collects and analyzes all file activity and events across every endpoint—even when endpoints are offline. In near real-time, security, IT and compliance teams can see where files move and reside, making it faster to investigate and recover from any data incident—from lost laptops and hardware failures to file exfiltration and ransomware. Built on security best practices and control requirements, Code42's solution also can be configured to help comply with GDPR, HIPPA, PCI and other regulatory frameworks. Supported by a global state-of-the-art cloud, a single admin can manage tens of thousands of endpoints. Today, the Code42 app runs silently on over 2.4 million endpoints across the globe.
