

# CloudPreserve™ for Code42 & Legal Hold Pro

Innovative legal hold and preservation software for the modern enterprise

CloudPreserve is a paradigm-shifting integration between Code42, the leading data protection and visibility software for large enterprises, and Legal Hold Pro, the most intuitive legal hold solution for corporate legal teams.

CloudPreserve connects two of the most widely adopted and secure enterprise solutions on the market. This partnership strengthens the eDiscovery preservation process by enabling legal teams to quickly deploy legal hold notifications from Legal Hold Pro and then automatically apply in-place preservation holds to data on custodian laptops and desktops that are protected by Code42.

By leveraging the custodian's existing data backup and recovery software to preserve data, CloudPreserve prevents data spoliation, reduces risk, and empowers legal teams to operate with minimal IT support.

**CloudPreserve makes it remarkably easy to preserve custodian computer data**

**1. Create a legal hold notice**

From Legal Hold Pro, customize your legal hold language, attach a questionnaire, and schedule automated reminders to boost compliance.

**2. Click to preserve custodian computer data**

Click the box. CloudPreserve will automatically send the request to Code42, log the activity in your report center, and create a defensible audit trail.

**3. Relax**

Code42 will update the custodian's preservation policy to prevent the accidental or intentional destruction of data.

**ZAPPROVED**

Legal Hold Pro makes it easy to initiate legal holds, track custodian compliance and generate a defensible audit trail of activity

**CODE42**

Code42 silently and continuously backs up every version of every file on laptops and desktops, without disrupting the end user

**CloudPreserve™**

CloudPreserve connects Legal Hold Pro with Code42, allowing users to apply in-place preservation holds to custodian computer data, preventing spoliation and reducing risk

### Streamline eDiscovery workflow

CloudPreserve makes it effortless for legal teams to manage legal holds, track compliance, apply in-place preservation holds to computer data, and create a defensible audit trail of activity.

### Say goodbye to manual data collections

By leveraging Code42's existing backup systems, CloudPreserve empowers legal teams to preserve data on laptops and desktops, while eliminating the need for manual data collection and IT support.

### Rest assured with world-class data security

Both Code42 and Zapproved protect your enterprise with industry-leading security practices and SOC 2 Type 2 Certification, which demonstrates adherence to information security, availability, integrity, confidentiality, and privacy best practices.

### About Zapproved

Zapproved LLC is a pioneering leader in cloud-based eDiscovery software for corporate legal and compliance departments. Our suite of intuitive and scalable solutions empowers teams to seamlessly and defensibly initiate legal holds and collect, process and review data with ease. We are also SOC 2 Type 2 certified, the industry's highest rating for data security. With 99% customer retention, we continue to cultivate ridiculously happy customer experiences year after year.
