

PROOF OF VALUE (POV)

Try the Code42 Incydr™ solution in your own environment

The uncomfortable truth is that whether accidental or malicious, people who have access to your company’s data often put that same data at risk. Incydr was built to help you target this problem. You can see how through our Proof of Value process. We will work with you to set up a real-world pilot that will provide insights into where and how data is leaving your organization.

Proof of Value Benefits:

Gain visibility into blindspots

- Detect data risks across your entire organization — within hours of starting
- Get actionable insights that can be shared with others

Detect and respond to data risk caused by insider threat

- Gain access to our award-winning security solution, including our risk detection lenses.
- See if your data is being shared via unsanctioned cloud services, USB drives or email.

Speed up investigations

- Leverage Code42 security experts to identify gaps in your insider threat program.

Try it for yourself. Don't let your inside be your blind side.

What your peers have experienced during Incydr POVs:

A computer networking company found that every single departing employee took data. They immediately embedded Incydr into their employee offboarding process.

An auto manufacturer discovered multiple users bypassing their blocking controls and maliciously leaking data. Their security team now uses Incydr for every insider threat investigation.

A consumer goods manufacturer discovered several instances of confidential marketing material being moved to unsanctioned cloud collaboration accounts. They also identified a number of employees syncing large volumes of data to their personal cloud accounts. Incydr is now their primary security tool.
